Scrub Suits | Surgical Gowns | Doctors Lab Coats | Nurse Uniforms | Support Staff Uniforms

Fabric features shown in the supplier reference

The photographed supplier pages state fade-resistant, soft and breathable, 65/35 polyester/viscose blended fabric, and sweat absorbing/skin friendly. These are supplier catalogue statements, not independently verified KANTIRA claims. Validate fabric composition and performance before using these claims on product listings or advertisements.

Colour approval note: digital colours can vary by screen, lighting and printing. Always approve the physical fabric swatch before bulk cutting or production.

Fabric Colour Reference

Shade names and codes transcribed from the supplier catalogue photographs provided. Colour chips are approximate digital references only.

Production & Website Publishing Checklist

A practical quality checklist for KANTIRA’s digital catalogue and product pages.

Fabric specification	Confirm composition, GSM, usable width, shrinkage, colourfastness, pilling and wash-care instructions.
Garment specification	Finalize style, measurements, size chart, pocket layout, stitching, trims and packaging.
Clinical claims	Do not claim sterile, antimicrobial, fluid-resistant or protective performance unless the finished product is tested and the claim is substantiated.
KANTIRA identity	Use KANTIRA labels, packaging and product photography; do not use supplier branding in customer-facing artwork.
Product photography	Replace illustrative models and concept visuals with actual KANTIRA product photos for final product listings.
Website listing	Upload the PDF to the website media/library area, then add a visible “Download Catalogue” link on the relevant public page.

This KANTIRA-branded reference catalogue was created from the supplied fabric catalogue photos and a newly generated concept layout. The generated marketing artwork is illustrative; verify every shade, product detail and claim before publishing commercially.
